BRIGHT AND MODERN SEASIDE MAISONETTE WITH PRIVATE POOL (E-ST) – GLYFADA, ATTICA

This new development will be located in the upper part of the coastal area of Glyfada - Ano Glyfada. Glyfada is considered the most famous area of the entire south of Athens and has been a center of attraction for both the local population and tourists from all over the world for many years. This is an area with a well-developed infrastructure: there are a large number of parks and squares, schools and kindergartens, shops and supermarkets, entertainment and sports complexes, hotels, cafes and restaurants. There are many beautiful public and organized beaches along the coastline of Glyfada. In close proximity to this area is the territory of the former airport, on the site of which one of the most discussed projects in all of Europe is currently being developed - Elliniko Park, which is an incredible project that will bring to life the creation of a huge park area with numerous sports and educational institutions. Glyfada itself is divided into two parts - upper and lower. The upper part of Glyfada is a quieter residential area compared to the lively and vibrant area of central (lower) Glyfada, which is a big plus: being in close proximity to busy places, you can enjoy privacy and silence. This particular location has been a priority for many years when choosing a place of residence among the local population. This new building will be distinguished by its minimalistic design, well-thought-out aspects of functionality and ergonomics, as well as the use of materials and technological systems of the latest generation. The building will consist of 6 floors, on its different levels there will be apartments and two-level maisonettes of various layouts. This maisonette will be located on the 5th and 6th floors, and its area will be 138 sq.m. The lower level will feature a spacious living room with separate seating and dining areas, a kitchen, 1 bedroom and 1 guest WC. From this level of the maisonette there will be access to a large terrace where a pool-jacuzzi will be installed. On the top floor the maisonette will have 2 more bedrooms and a bathroom. This maisonette will have 2 parking spaces and a storage room on the -1st floor of the building. The completion of the construction works - 2025.

Building area: 138 m²

Levels: 2

Bedrooms: 3

Bathroom: 1

Built: 2025

Energy Performance Certificate: A
